

TORISEVA Nature Trail is about 6,5 km (4 ml) long. The path leads to varying grounds: from low areas close to water level you climb up to higher cliffs. It takes about 2-3 h to walk around the whole trail. Along the trail you may have a picnic break at a campfire place.

Along the trail there are **13** guiding points that tell about the **TORISEVA** area, but also about the whole of Virrat, its long and interesting history.

When walking along the nature trail you have to be cautious, because in places there is a drop of more than **10 m!** When wet the lichens and mosses on the cliffs are **slippery**. The whole trail is marked with orange paint on the tree trunks.

Part of this nature trail goes side by side with a long provincial trail called **Pirkan taival**.

You may enter the nature trail from many places. At Route 66 there is a good **parking place**, where from you may easily start your hiking tour.
